

MUSIC AT KS4

PUPILS WILL STUDY AREAS OF MUSIC SUCH AS:

1. Music Solo & Ensemble Performance - Pupils will be introduced to various performance techniques.
2. Music composition - Pupils will be introduced to various music composition techniques, this allows students to create music using music softwares or traditional notation.
3. Music Industry - This will give an insight into job roles available in the music industry apart from performing artist.
4. Appraising - Pupils will be introduced to many styles of music. Pupils will enhance their analytical skills as they learn how to analyse music.
5. Product Management - Pupils will learn how to manage a music product and deliver it. It can be a recording production or a live concert/performance.

WHY CHOOSE MUSIC?

Music is a subject that enriches and broadens the pupil's mind while nurturing their creativity.

You will gain and improve skills such as communication, collaboration, multitasking, problem solving and creative skills, all which are sought by employers in the modern world.

You will have the opportunity to learn an instrument and benefit from private tuition once a week in your chosen instrument.

You will be able to enjoy music and express your ideas effectively through composition and performances during the course.

CAREERS LINKS

The courses offered provide you with the knowledge and skills to progress into further and higher education at college and university, to courses such as:

Music Performance, Music Composition for films and games, Sound Engineering

Choosing music does not mean you have to follow a musical pathway, the skills you will gain will be as useful in other career paths such as Business, Engineering, Performing arts, Science etc...
